Business areas	Management of CCI Group companies and ancillary business, real estate leasing, and basic research

#### CCI CORPORATION

Headquarters	12 Shinhasama, Seki City, Gifu Prefecture 501-3923
Date of establishment	May 31, 1949
Paid-in capital	1.26 billion yen
Business areas	Development, manufacturing and sales of automotive chemicals, car care supplies, resin and rubber products, soundproofing and vibration control materials

### Global Network (12 sites in 8 countries overseas, 4 companies with 8 locations in Japan)

### Business Content

#### Automotive Chemicals Division

As an OEM supplier for leading automotive manufacturers, we mainly supply engine coolant and brake fluid, providing customers with safety and peace of mind. We have established a manufacturing and supply system that enables our products to be used by automotive manufacturers all over the world. We also produce car care supplies, offering products through dealerships and specialty stores that help professionals and everyday drivers alike to optimally manage their vehicle.

##### Main products and research themes

- Engine coolant
- Brake fluid
- Windshield washer fluid
- Antifreeze for hot water floor heating systems
- Automotive coating agents
- Glass coating agents

#### Residential Construction Materials Division

We provide materials that can absorb sound and vibration, as well as soundproof drainage pipes that combine PVC pipes with insulating material. These products are available for use in everything from detached homes to apartment buildings. In addition to improving people's living environment, we are also proactively introducing products that reduce the time and effort needed for construction. We also provide microbial agents that can break down fats and oils.

##### Main products and research themes

- Soundproof drainage pipes
- Fire protection pipes
- Vibration damping sheet and paints
- Fat and oil-degrading microbial agents

#### Industrial Tires Division

In the thermoset urethanes segment, we mainly focus on tires created by adhering injected urethane to the wheel. The adhesive properties of urethane, vital in assuring vehicle safety, provide an unrivaled advantage and urethane is widely used in material handling and recreational equipment. We are expanding our urethane wheel product line to include environmentally friendly (antibacterial and conductive) applications. We attend carefully to customers' requirements starting at the design stage and arrange smaller lot production as necessary.

##### Main products and research themes

- Industrial urethane wheels
- Solid tires

#### R&D Department

The R&D Department provides support for the implementation of divisional and departmental product strategies and conducts research on the diverse functions of living organisms and how these can be utilized in daily life. To date, our achievements include developing supplements that enhance the quality of life and health as well as researching techniques to purify contaminated water and soil to safeguard the global environment. Because there are no restrictions on the research topics we address, we can take on challenges in a wide range of fields. We also conduct joint research with universities to continually pursue new possibilities.

##### Main products and research themes

- Fat and oil-degrading microorganisms
- Plant extracts
- Functional materials

## Overview of the CCI Group

## CCI Products That Support Daily Life

CCI products are used in many different areas of people's daily lives. Here, we present examples of how these products are used in familiar aspects of our living environment.
